## M: Course Objectives / Learning Outcomes

In this course students will have opportunities to:

- Develop an awareness and sensitivity to ethical issues and potential ethical concerns in their psychiatric nursing practice.
- Examine various ethical theories, concepts, principles and decision-making models.
- Develop strategies for ethical and moral decision-making.
- Apply ethical and moral reasoning and decision-making to ethical problems in psychiatric nursing.

## N: Course Content

The focus of this course is applied ethics as it relates to psychiatric nursing practice. Theoretical perspectives which empower individuals and families; adhere to fundamental human rights principles; respect autonomy; attend to diversity issues; attend to family and team inputs; and, attend to and apply professional codes, competencies and standards of practice, will be integrated into content areas. Following is a brief synopsis of broad content areas. Other content may be included, depending on experiences, interests and choices of course
