M: Course Objectives / Learning Outcomes

Upon successful completion of the course the learner will be able to:

- Describe who makes up the gerontological population and confront discrimination of the elderly through the examination of long-held, inappropriate myths, beliefs and ageism.
- Articulate theoretical frameworks of aging and models for working with the elderly.
- Explain normal development and aging, along with some selected pathological changes that may
 occur.
- Consider the range of nursing roles in gerontology
- Understand and utilize new data collection and documentation skills, specifically designed for the older adult within the context of the Neuman Systems Model for Nursing.
- Understand the therapeutic and preventative measures needed for elders and the environments they live in, including hydration and nutrition, fall prevention and socialization.
- Integrate key theory and practice for individuals that present with exemplars such as: dementia, Alzheimer's, delirium, substance misuse, neglect and abuse of all kinds, as well as depression, pharmacological considerations and others.
- Demonstrate awareness of the key role that psychiatric nurses can play in caregiver support.
- Work knowledgeably and sensitively with families, friends and nurses who have to deal with end-of-life concerns.

N: Course Content:

SECTION 1: FOUNDATIONS

Describe the diversity of the older adult population group, along with pertinent facts and trends regarding:
